

THE GLEICHEN CALL

VOLUME 47 NO. 6

Authorized as second class mail, GLEICHEN, ALBERTA, WEDNESDAY APRIL 28, 1954 SUBSCRIPTION \$2.00
Post Office Department, Ottawa.

C. of C. Council Hold Session

A council meeting of the Chamber of Commerce was held Friday evening in the town office. Among those present were: President Ross Fiddes, H. T. Colpoys, Wm. Blaney, O. Nerland, Dick Tower, Bob Brown, Geo. Burne and Secretary Austin Horn.

This matter of insuring the rink was gone into. The secretary was instructed to enquire into insurance rates from various mutuals.

On a motion by Bob Brown and W. Blaney it was decided to make a donation to the Meadowbrook Hall, towards travelling the approaches. The amount granted was \$25.

The following committees were appointed:

Finance—R. Fiddes, H. Colpoys and A. Horn.

Membership—Ray Cunningham, R. Hunter and A. Horn.

Town and country relationship—D. Tower, R. Cunningham, G. Burne, H. Bogstie, H. Colpoys and W. Blaney.

Nominating committee—O. Nerland, C. Hatton, A. MacCallum.

Sports and entertainment committee—B. Brown, B. Stott, H. Bogstie, D. Tower.

Calf club—O. Nerland, Dave Yule, Leo Stott and Alvin Mullen.

It was decided that the local Chamber of Commerce join the Alberta Chamber of Commerce and table joining the Canadian Chamber of Commerce.

A committee was appointed to meet with representatives of the Recreation Centre to arrange for a joint bingo night. This committee will consist of members of the entertainment committee and finance committee.

All outstanding accounts were referred to the finance committee and if found correct were to be paid as funds become available.

A committee was appointed to enquire into the cost and plans for a swimming pool. This committee consists of R. Fiddes, H. T. Colpoys, R. W. Brown and Wm. Blaney.

It was decided to request a grant from the town sufficient to cover the taxes on the 30 acres known as the fair grounds.

The final bit of business was the decision to have the secretary write Standard Gravel regarding the swimming pool.

The adjournment motion was made by D. Tower and O. Nerland.

FROM THE FILES OF THE CALL TWENTY YEARS AGO

Rev. V. M. Gilbert is to be the guest speaker in Calgary United Church next Sunday.

Florence Jeffers, daughter of Mr. and Mrs. L. Jeffers, who underwent an operation for mastoid recently is now making good progress towards recovery.

H. Stromsae of Eagle Hill is at present visiting his daughter in town Mrs. C. Johnson.

Great progress has been made by farmers on the land throughout the district. Likewise the town gardeners are stepping out and getting the gardens into shape. Vast piles of rubbish and weeds have disappeared in smoke and already most of the town is looking spic and span.

The U.G.G. elevator officials are moving the residence used by their agent to a more desirable sit in the eastern part of the town.

Misses V. and R. Hayes have returned to Calgary after spending a few days visiting their parents Mr. and Mrs. R. B. Hayes.

Cold, snow and wintery weather still continues much to the disgust of everyone. Away back about the year 1815 there was a year without a summer. Snow lay on the ground all summer. Perhaps history will repeat itself this year. It might be a good thing we could curl all summer and eat up a lot of the surplus wheat that is now in storage.

Due to erosion Niagara Falls has moved a quarter of a mile upstream since it was first viewed by a white explorer 225 years ago.

Conservation of Human Life

(Communicated)

Conservation of life is foremost among material things in the minds of men. We know nothing that causes more unhappiness than being subject to disease and the threat of unseasonable death. Still many of us have gone through five, ten or twenty years of suffering, all but forgetting the sensation of genuine health. Some are careless, some are fatalistic, some forget that science marches on and that a disease, which was untouchable a few years ago may now yield to enlightened chemical or surgical or other therapy.

This century has experienced the greatest advance in knowledge of health and disease of any period in history. Human life has been lengthened through the application of scientific knowledge and the improvement in our standard of living. Persevering and profound research has increased our knowledge of effective diagnostic treatment methods. Progress in public health measures is saving millions of lives every year. Engineering and technology add their important contributions in the way of improved housing, filtered water, sewage disposal, refrigeration and in a hundred other ways.

In Canada the cost of health care is substantially shared by all citizens through public health programs financed out of taxes. Though under our constitution the health of citizens is a provincial government responsibility, the federal government stepped into the picture six years ago with a national program. As an outcome thousands of hospital beds have been made available, medical research has expanded, training has been provided for public health workers, and long strides have been made toward control of certain diseases.

Physicians often marvel at the indifference of many intelligent persons to serious thought about the common functions of their bodies. Doctors who have been long enough tinkering carelessly humans to have frown a little when in the effort lament the way people have of taking no notice of disease until it is upon them in full force.

Illness begins usually as a slight deviation from normal function. That is where the wise person becomes alert, and takes steps to restore normality. The unwise person resents anything that meddles with the routine of his life. He belittles the idea of doing something effective about it, even when symptoms clamorously intrude on the pattern of his daily business. Sometimes, one doctor remarked reproachfully, this goes on until the scene is more fittingly presided over by a clergyman than by a physician.

Some people worry because they think they may have an incurable disease. They delay going to a doctor, avoiding the moment when their fear is to their self-destruction. If there is disease the delay has wasted time in which it might be tackled and arrested or cured, while if there is no disease the continued fear has worn them down in needless anguish. Some amount of fear is necessary to survival in this world. Rashness does not pay off any more than does feverish concern. But the thing to do about fear is to face it, recognize it as a signal of warning, and then start in to fight the cause of it.

To ascertain what is wrong with an ailing person is no light undertaking. A medical man's success in diagnosis depends upon his knowledge of nature's response to various insults and injuries, and upon his ability to evaluate the evidence of disease and interpret it correctly.

On way to live longer is by having regular medical check-ups by a physician who knows us and our medical history. Has it occurred to men to think that the more favorable life expectancy of women may be due to some part to their greater readiness to seek and follow medical advice?

The life insurance companies have played an important part in this.

As musical director of many C BC productions, including "Fiddle Joe's Yarns", "Songs de Chez Nous", and "A Date with Fred Hill", Art Morrow uses up a lot of midnight oil keeping up with

both the conducting and arranging ends of programs. Handing out a bit of special coaching on his special scores is still another job. Here at the receiving end is pretty petite songstress Joyce Hahn.

Many times each week it is evident that the spirit of the western Canadian pioneers, to be helpful, to be hospitable, to be friendly and to be efficient, are still part of our everyday life. The building bees to erect new structures following fires, the help to neighbors suffering hardships or sickness are evident each week. Many times each spring and fall season groups of farmers gather together with their equipment to either seed or harvest the crop of less fortunate neighbors. Accident or sickness during bad weather send a whole community into co-opera-

tive action to battle for the life of one of their members against mud or snow plugged roads. Although the "help your neighbors and boost your community" tactics have changed through the years, they still see action through spirit of the early pioneers of western Canada. The spirit will prevail and number of accomplishments increase—it is the western way of life.

Canadian women bought nearly three and a half million dollars worth of home permanent wave kits in 1953.

St. Victor's Parish Hall Opened

Last Thursday evening St. Victor's Church opened their parish hall which was well attended by people from town, country, Cluny and Strathmore.

Some months ago under the direction of Fr. Violini members of parish set to work and excavated the basement of the church and make it into a hall. After much labor the work was finished recently. The hall extends the full length and width of the church and is almost completely finished and furnished.

The entrance is at the rear of the church and at the west end a stage has been erected. The place is heated by new oil heating system.

A short program was put on by members of the church, namely: Lynn Krause, Dianne Collins, R. Barstad, W. Smith, Vern Smith, L. Rogowski and Mrs. Geo. Desjardine.

Addresses were delivered by Fr. Violini, Mrs. G. Desjardine, John Reilly of Cluny, Chas. Hatton, G. Desjardine, Leo Desjardine, W. Plante and N. T. Purcell.

During the evening Miss Hopfson was presented with a corsage by Mrs. G. Desjardine on behalf of the members of the parish.

After the program a lunch was served by the ladies.

11,000 years ago, in the last of four glacial epochs, Canada was covered by a sheet of ice that ranged from one to two miles in thickness.

CANCER can be cured

● It's possible. It's probable. The big question is . . . In how many cases? Right now, with present medical knowledge, the number of cancer cures could be doubled.

But we need your dollars . . . to spread information, to make more detection programs available, to assist doctors, and to aid laboratory workers in the great fight to find more cures for cancer.

We ask your help! There's no time like the present—there's no time to lose. Now is the time to GIVE TO THE CANCER CRUSADE. Give generously when your local canvasser calls or mail in your contribution.

Mail this coupon with your contribution to "CANCER" 231 - 7th Ave. E., Calgary I want to help Cancer Crusade Enclosed please find \$..... Name Address Canadian Cancer Society

There are 28,000 different cattle brands registered by ranchers with the Alberta government.

In a year Canadians eat nearly thirty million gallons of ice cream.

Canadian railways transport about three million tons of revenue freight every week, equivalent to about 43 pounds of freight per Canadian per day.

"Aren't you glad we tried them all before we chose?"

"Yes, and one drive was enough to prove that Monarch outclassed them all."

Where a fine car matters Monarch belongs.

ONE DRIVE AND YOU'LL HAVE PROOF

PROOF OF THE EXTRA SAFETY AND SMOOTHER, QUIETER PERFORMANCE IN MONARCH'S GREAT NEW 161-HP. V-8

PROOF OF MONARCH'S MATCHLESS STABILITY, ITS REASSURING CONTROL ON THE CURVES, ITS NEW STEADINESS ON THE STRAIGHTAWAY

One drive will give you convincing evidence of Monarch's incomparable performance. You'll feel the amazingly responsive and flexible power of Monarch's great new 161-HP. V-8—today's most advanced and efficient type of engine, made by Canada's most experienced V-8 builder. This means smoother performance, faster acceleration and an extra reserve of safety. You'll experience a completely new feeling of stability, a reassuring, road-gripping steadiness on curves and on the straightaway—the result of Monarch's revolutionary new ride control system—Ball-Joint Front Suspension. You'll ride in new luxury, in new quietness, in Monarch's beautiful interiors—so comfortable and so restful. A phone call will bring a Monarch to your door.

MONARCH LUCERNE COUPE

Ride like a King in a

Monarch 161-HP. V-8

(Certain features illustrated or mentioned are "Standard" on some models, optional at extra cost on others.)

Prairie Tree Planting Car Opens Annual Tour

It all began 34 years ago. A handful of Western Canadians gathered at Winnipeg to solve an urgent prairie problem. They wanted every prairie farmer to know about the value of shelterbelts of trees for home improvement, for productive gardens, for more pleasant living conditions and betterment of farm values.

So they appointed a man to tell everybody about it, with the Canadian Pacific providing a railway auditorium, and both Canadian National and Canadian Pacific undertaking to move this "Classroom on Wheels" on their western lines. He was soon known as the "Traveling Schoolmaster" and the public response was immediate and hearty. The Canadian Forestry association was his sponsor.

This interest in tree planting has now spread to field shelters for the increase of grain yields and the protection of farm soils. Fifty to sixty sections, co-operatively planted with sheltering trees 15 years ago have proved their worth through restored water tables, increased crop yields and insurance against disaster in bad years.

Once again this unique traveling schoolroom will be visiting prairie communities on its thirty-fourth consecutive tour of the west. The programs presented to both adults and school pupils demonstrate what can be accomplished by the use of trees, and also provided practical planting instructions in what trees to plant, and how to plant them, the laying out of the home grounds, and the development of shelterbelts and field shelters.

Shelterbelts are today recognized by thousands of farming people as an essential part of

prairie farm life. The steady increase in the use of trees for both rural and urban planting gives promise that the once bleak and open prairie is slowly giving way to a land of beauty and protection provided by prairie tree planting. The future will see much greater use of trees, along our highways, as living snow-fences, and in community undertakings for recreation.

The success of our tree planting campaign has been due to the generous co-operation extended this undertaking by the press, radio, and a great many individuals and organizations. We hope this work, devoted to improving the living conditions and opportunities of our western people, may continue to merit the widespread and effective assistance it has always enjoyed.

Meetings are held in the Car, at each point on the itinerary, at eight o'clock in the evening. When schools are open, arrangements are made with the school authorities to have the Pupils visit the car during school hours. Sound films show the results obtained by farming people through planting trees, and give practical instruction in tree planting and home beautification. An illustrated talk covers planting methods, which trees to plant, the laying out of a shelter belt, and planning the home grounds, with information on the care of trees and shrubs. A question period follows each evening meeting.

DOUBLING OF ALBERTA'S POPULATION
EDMONTON.—Doubling of Alberta's population to 2,000,000 within nine or 10 years from now is predicted by Hon. C. E. Gerhart, minister of municipal affairs.

Drive With Care!

A-MOO-SING—It's utterly unbelievable, but the contraption above is an artificial cow which uses radioisotopes to form milk. Dr. J. C. Shaw, of the University of Maryland's dairy department demonstrates the mechanical cow at an exhibit in Washington, D.C., showing the uses of atomic material in agriculture.

Revered Building Ends Sixty Years Of Service To Morden

MORDEN, Man.—The old school—as it was known to thousands who passed through its portals—is gone! The once majestic stone building whose service ended last year with the building of the new

MOONE'S EMERALD OIL not only helps promote rapid and healthy healing in open sores and wounds, but boils and simple ulcers are also quickly relieved. In skin afflictions—the itching of Eczema is quickly eased. Pimples, skin eruptions dry up and scale off in a very few days.

MOONE'S EMERALD OIL can be obtained at any drug store satisfaction or money back.

PEGGY

and modern high school is now completely razed. Little now remains. Stone from the building went to various spots.

The International Peace Garden will have some of the fine old stone gracing parts of it. It is hoped that the proposed gateway to the beach at Lake Minnewashta in Colpet Park will be banked by some of the square cut granite. Some went into the base of the diving tower at the beach, loads were hauled to various parts of this district for as many purposes.

Sixty-one years ago the school board of Maple Leaf Schools was faced with the same problem as the present board—lack of space. There had been a heavy influx of settlers and many had moved from Nelson—replacing the old log building south of town—was not enough. The late Stuart Scott and James Nelson moved into town to become the first court house and jail in a building that used to be at the corner of Stephen and Nelson moved it down. The log school was moved into town to become the first court house and jail and a building that used to be at the corner of Stephen and Nelson was used as a school.

The late Judge Corbett Locke and J. B. McLaren spearheaded a drive for a new school and the board obtained the property—the present site north of Thornhill between 10th and 11th streets—although a lot of people said it was too far out of town! The result was the building that has just ended its days. Considered then one of the finest in the province, it cost \$16,000. Builders were H. McGinnis, Scott and Rutherford, Geo. Selley, John Morran, Wm. Bell and others. The school opened in 1894, with the late W. J. Cram as principal.

The fine old building served long and well.—The Morden Times.

PRINTED IN 1777

REGINA.—Printed in 1777, a "new and correct map of North America" is on display in the Legislature library here. It is in the custody of the library's archives division.

Enlarging Country Elevator System

REGINA, Sask.—A \$3,300,000 building program to enlarge its country elevator system was announced recently by the Saskatchewan Wheat Pool.

The pool said nearly \$2,000,000 will be used to build 20 elevators in the province and 50 annexes. All will be permanent structures.

Additions will increase capacity by 2,250,000 bushels, raising total pool capacity to 75,000,000 bushels.

The announcement said about \$1,000,000 will be spent on modernizing and maintaining other parts of the country elevator system. About \$300,000 will be spent on agents' homes.

FARMER SHOT OWN CHICKENS BY MISTAKE

TONKIN, Sask.—George White, a farmer who recently had some chickens stolen, jumped out of bed one night when he heard a strange noise from the chicken coop.

Dressed only in his long underwear, he grabbed a shotgun and went outside. Just as he kicked open the door to the chicken house and poked the gun in, a dog which was following unknowingly nudged him with his cold nose.

The gun went off and White shot 28 of his own chickens.

Home Workshop

If you want the family to treat your pipes with proper respect, make a rack for them that will do them proud and let it include humidors drawers that will keep your favorite tobaccos moist. The larger of these two pipe racks also has a handy drawer for pipe cleaners and odds and ends. It is seventeen inches high, twelve inches wide and displays a dozen pipes. The smaller rack is the same width but only two-thirds as high and holds a half-dozen. Clear pine or any wood that takes a high polish would be the kind to use. The humidors are air-tight glass jars. The pattern gives tracing diagrams for the shaped parts as well as the steps in assembling and finishing. Ask for pattern 406 and enclose 35c.

You can make this cement bird bath. The mold for forming the concrete is a simple job using common mason lath. A little cement, sand and gravel are all you need for the concrete mix. The pattern shows just how to use the lath to get the fluted effect of the pedestal, and the octagonal basin. Once the forms are made the materials for a number of these attractive baths cost very little. The pattern gives actual-size guides for preparing the molds as well as the formula for the concrete; and the construction steps are illustrated. A few bird houses and a feeder are sure to attract the songsters. A number of interesting designs are included in the Bird House packet which is priced at \$1.50. The bath pattern 227 only is 35c postpaid.

Department P.P.L., Home Workshop Pattern Service, 4433 West Fifth Avenue, Vancouver, B.C.

OUR COMPLETE SHORT STORY—

Wake Up, Lydia

By F. T. Martin

"I'm not one to talk," whined Lydia Doolittle, "but it's gospel."

Beady eyes squinted with glee as she glanced furtively around the post office. She watched the effect of her words on the clerk. Satisfied, she clutched a handful of skirt and hobbled toward the door.

Suddenly she stopped. "My lan!" she squeaked.

One of the posters on the bulletin board bore front and side view pictures of a man. Reward was offered for information leading to the capture of one Ralph Brady, wanted for armed robbery.

The spinster Doolittle adjusted her ancient spectacles.

"My eyes ain't what they was," she muttered, "but if that don't look like that Smith feller who's been hangin' around. It's good somebody in Colville is awake."

The clerk left the stamp window for a moment. Temptation and opportunity struck together. So did Lydia. With a darting claw, she snatched the notice, thrust it into the folds of her clothing, and went out.

"Ain't nobody a'goin' to get credit for catchin' this John Smith but me," she snorted. "Trouble is nobody's awake in this town. That's why we have only one factory."

Miss Doolittle didn't like John Smith. He had registered at the hotel, two weeks ago and no one seemed to know anything about him. All he did was wander around Colville or go over to Keene Falls and wander there. He had been

seen at the railroad station one day, along the river bank on the next, or around the factory on another.

"That's it!" she cackled. "The factory! They're paying the yearly bonus next week and I'll bet that Brady alias Smith has his eye on it."

Mr. Boswell, the barber, was standing outside when she passed. "Afternoon, Miss Lydia," he called. "You look a mite flustered. Anything wrong?"

"There's plenty wrong, Will Boswell," snapped Lydia, "but you'd never know it sunnin' yourself like a cat. As a councilman you should be thinkin' about ways to perk up business around here."

"Now, Lydia..."

"Or," whispered the spinster, "a way to keep criminals off the streets."

The barber leaned forward. "Know some'n?"

"Mebbe," answered Lydia. "Mebbe I know what that Smith feller is. Mebbe he shouldn't be walkin' the streets a free man. Good day."

Miss Doolittle made six more stops on the way home and six more cryptic remarks about John Smith. By supper time, her phone was ringing steadily. But she would say no more.

"At the proper time," she told everyone, "I'll speak my piece."

The situation, thought Lydia, was made to order.

The factory payroll delivery was next Thursday. The Colville Business Improvement Committee meeting was also Thursday. She would wait until then before telling the police. She smiled as she pictured herself marching into Grange Hall with the mysterious Mr. Smith in irons.

"Hmph! Even his name sounds fishy."

Colville began to buzz. People remarked that Mr. Smith did look as though he had a criminal face. But if John Smith suspected any of this, he didn't show it. He continued his walks, and minded his own business.

On Thursday, Miss Doolittle was also minding his business. She was in the sheriff's office, waving her poster and demanding that "the police wake up."

The sheriff waited for her to finish talking. Then he led her to the hall.

"Someone needs waking up," he said quietly.

"B-but the p-p-payroll," stam-

CHAIRMAN—Mr. Gerry O'Shaughnessy, Commissioner of the Moose Jaw Chamber of Commerce, replaces Mr. R. L. Hutchinson as chairman of the Saskatchewan Golden Jubilee homecoming and reception committee. Mr. Hutchinson's resignation from chairmanship was for reasons of health, although he still remains a member of the committee.

meled Miss Doolittle. "It arrives in a few minutes..."

The Business Improvement Committee of Colville was in full session and there was standing room only. John Smith was speaking.

"So when my company," he was saying, "sent me to select a site for their new factory, they were concerned not only with location, but with the people. I found two suitable locations, one here and one in Keene Falls. I am sorry to say I will recommend Keene Falls."

The crowd stirred and looked at Lydia Doolittle.

Mr. Smith continued. "Naturally, you businessmen will understand that I had to keep my mission a secret to everyone except the sheriff in order that real estate prices would remain normal. You see," he added with a smile, "my name is really John Smith and it may surprise most of you to know that I am not wanted by the police."

Lydia Doolittle didn't hear any more. Her thoughts were concentrated on reaching the door but faces seemed all around. Suddenly the face of the sheriff came closest.

"If I hear another word of gossip," he said firmly, "there will be a little matter of stolen property from the post office."

But Miss Doolittle didn't hear him. She had fainted.

LINDALEE NEEDLE-WEAVE

Wedding showers will soon be honoring the June brides-to-be. What more delightful gift than these needle-woven mules to match her negligee! Complete instructions in the Lindalee Needle-Weaving Instruction Book (45 cents). Needle-weaving is new, different, easy to do, won't shrink, won't sag or bag takes half the time of a fast knitter. Only nine different stitches to learn for all purposes. Eleven patterns in the book. Order through—

Dept. PPL, Home Workshop, Patterns, 4438 West Fifth Ave., Vancouver, B.C.

Mauna Loa, 13,680-foot-high volcanic peak in Hawaii, is believed to be the world's largest mountain in total volume.

If You're TIRED ALL THE TIME

Everybody gets a bit run-down now and then, tired-out, heavy-headed, and maybe bothered by backaches. Perhaps nothing seriously wrong, just a temporary toxic condition caused by excess acids and wastes. That's the time to take Dodd's Kidney Pills. Dodd's stimulate the kidneys, and so help restore their normal action of removing excess acids and wastes. Then you feel better, sleep better, work better. Get Dodd's Kidney Pills now. Look for the blue box with the red band at all druggists. You can depend on Dodd's. 52

Funny and Otherwise

The worried man appealed to the psychiatrist: "You've got to help me doctor! All day long I want to eat grapes."

"Well, think nothing of that," soothed the doctor. "Everybody eats grapes."

"Off the wallpaper?"

"Ruth," moaned her long-suffering husband, "you promised you wouldn't buy a new dress. What made you do it?"

"Dear," replied the modern Eve, "the devil tempted me."

"Why didn't you say: 'Get thee behind me, Satan?'" the poor man inquired.

"I did," the woman replied, sweetly, "and then he whispered over my shoulder: 'My dear, it fits you just beautifully at the back.'"

Circus manager: "You are pretty small for a wild animal trainer."

Applicant: "That's the secret of my success: they're waiting for me to grow a little larger."

About the best way to solve your problem is to swap it with the other fellow. He always knows how to solve every problem except his.

"What makes you think your wife is getting tired of you?"

"Every day this week she's wrapped my lunch in a road map."

They sat in the gloaming.

"Just one," he pleaded.

"No, certainly not," she replied.

"Please, darling," he persisted.

"Don't ask me again," she insisted. "I've only one left, and I want to smoke that on the way to the office in the morning."

A preacher met one of his flock. "You were not at church last Sunday," said the parson.

"Too wet," was the reply.

"But," protested the minister, "it's always dry inside."

"That's another reason I wasn't there."

The chemist was getting exasperated. He had been explaining and pricing dozens of articles to the shopper, who didn't really want to buy anything.

Finally she picked up a bottle. "Is this Pest Exterminator reliable?" she asked.

"How is it applied?"

"You take a teaspoonful every half-hour, madam," the chemist replied pointedly.

Friend: "Well, and how's married life?"

Bride: "Wonderful—but what do you think? My husband really does stutter and I'd always thought it was emotion."

A Hollywood producer was filming a Biblical scene. Things were not going too well, and he stormed and raved about the studio.

"Listen to me, you guys!" he shouted. "I'm paying a thousand dollars a day for this sound apparatus, and I mean to get my money's worth. When those Ten Commandments are broken I want to hear 'em break! Get me?"

The office boy had been missing for the best part of the morning.

"Where the dickens have you been?" his employer demanded when at long last the lad sauntered in.

"To the post office, sir."

"And does it take you two hours to post a letter?"

"I beg your pardon, sir," said the lad with some heat. "Three letters!"

9,000 NEW TELEPHONE SUBSCRIBERS

CALGARY. —Approximately 9,000 new telephone subscribers were added in Calgary in 1953, bringing number of lines in use to 49,000. The capacity of the city telephone system has doubled in the last four years.

Manitoba Hereford Bull Sold To Alberta For \$4,000

BRANDON, Man.—Viking RJM 4th, R. J. McClement's big Hereford bull which swept the top honors list at the recent Manitoba Winter Fair, has been sold to the McIntyre Ranching Company of Alberta for \$4,000. Releasing this news, Mr. McClement said selling a Manitoba bull to one of the biggest Hereford ranches in Alberta was like taking coals to Newcastle.

"This is a real pat on the back for Manitoba Hereford breeders," he said, explaining that traditionally Alberta is the home of Herefords in Canada and rarely does an Alberta breeder, especially the big ones like McIntyre, buy an outside bull for a herd sire.

Ralph Thrall, present owner of the McIntyre ranch, required a new herd sire after his former sire won the recent Calgary bull sale show grand championship. He chose the McClement bull after receiving information regarding it from the men who judged the classes at the Winter Fair here.

"Some of the more important Alberta ranchers are casting their eyes at Manitoba herds," said Mr. McClement. He sold another bull, Fieldman, to a Rimbey, Alta., breeder two years ago, and it later won the Hereford grand championship at the Toronto Royal Fair.

As far as Mr. McClement recalls, these are the only two occasions on which Alberta Hereford breeders have bought Manitoba bulls.

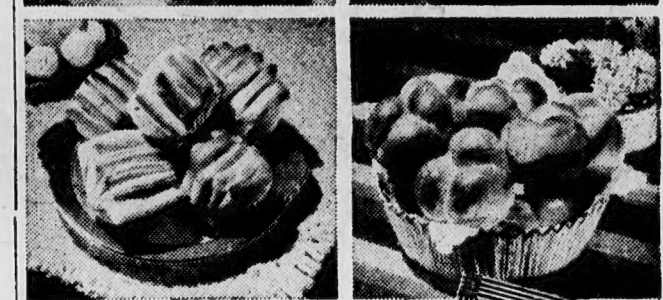

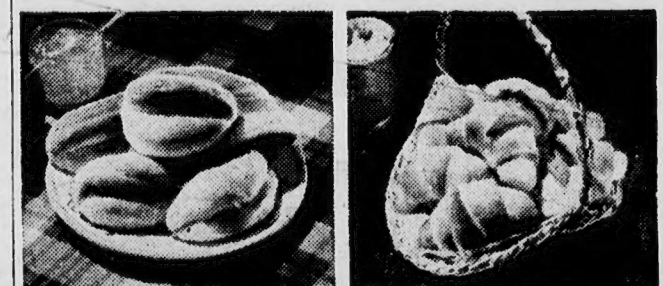

Viking RJM 4th was delivered to the C.P.R. here, and left early for the McIntyre ranch. Mr. Thrall, who is leaving on the all-expense trip to England he won along with the Calgary grand championship, bought the McClement bull sight unseen.

Main reason for changing herd sires from time to time is that new blood is required in any herd, Mr. McClement said.

New herd sire for the McClement farm, near Hayfield and about 15 miles southwest of Brandon, will be TH Larry Onward 52nd. Mr. McClement bought this bull at a Thorpe sale in North Dakota, where he also brought TH Revelation 75th, which sired his present champions.

TH Larry Onward 52nd is a three-year-old Hereford which Mr. McClement took to the 1953 Toronto Royal Fair, where it won the championship of its class.

4 delicious treats... make them from One Basic Dough!

It's amazingly simply with wonderful active dry yeast!

If you bake at home, find out the wonderful things you can do with Fleischmann's Active Dry Yeast! Serve fragrant rolls or fancy breads in variety from a single dough! Always get Fleischmann's Active Dry Yeast—it stays fresh in your cupboard, and acts fast in your dough!

BASIC ROLL DOUGH

Scald
1 cup milk
3 tablespoons granulated sugar
2 1/2 teaspoons salt
4 tablespoons shortening

Remove from heat and cool to lukewarm. In the meantime, measure into a large bowl

1/2 cup lukewarm water
1 teaspoon granulated sugar
and stir until sugar is dissolved. Sprinkle with contents of

1 envelope Fleischmann's Active Dry Yeast

Let stand 10 minutes, THEN stir well; stir in cooled milk mixture and

1/2 cup lukewarm water

Stir in

3 cups once-sifted bread flour

and beat until smooth and elastic; work in

3 cups more (about) once-sifted bread flour

Turn out on lightly-floured board and knead dough lightly until smooth and elastic. Place in a greased bowl and grease top of dough. Cover and let dough in warm place, free from draft, and let rise until doubled in bulk. Turn out dough on lightly-floured board and knead lightly until smooth. Divide into 4 equal portions and finish as follows:

1. PARKER HOUSE ROLLS
Roll out one portion of dough on lightly-floured board to 15-inch thickness; cut into rounds with 3-inch cutter; brush with melted butter or margarine. Grease each round deeply with dull side of knife, a little to one side of center; fold larger half over smaller half and press along the fold. Place, just touching each other, on greased cookie sheet. Grease tops. Cover and let rise until doubled in bulk. Bake in a hot oven, 400°, about 12 minutes. Makes 6 rolls.

2. CLOVER LEAF ROLLS
Cut one portion of dough into 8 equal-sized pieces; cut each piece into 3 little pieces. Shape each little piece of dough into a ball and brush with melted butter or margarine; arrange 3 balls in each greased muffin pan. Cover and let rise until doubled in bulk. Bake in a hot oven, 400°, about 12 minutes. Makes 8 rolls.

3. FAN TANS
Roll out one portion of dough on lightly-floured board into a rectangle a scant 1/2-inch thick; loosen dough, cover and let rest 5 minutes. Brush dough with melted butter or margarine and cut into strips 1 1/2 inches wide. Place 7 strips one upon the other and cut into 15-inch lengths. Place each piece, a cut side up, in a greased muffin pan; separate the slices a little at the top. Cover and let rise until doubled in bulk. Bake in a hot oven, 400°, about 12 minutes. Makes 8 rolls.

4. CRESCENT ROLLS
Roll out one portion of dough on lightly-floured board into a 14-inch round; brush with melted butter or margarine and cut into 12 pin-shaped wedges. Roll up each wedge of dough, beginning at the outside and rolling toward the point. Arrange, well apart, on greased cookie sheet; bend each roll into a crescent shape. Brush with melted butter or margarine and sprinkle with salt. Cover and let rise until doubled in bulk. Bake in a hot oven, 400°, about 12 minutes. Makes 12 rolls.

Conservation of

bringing about our present high standard of life conservation. Some have distributed vast quantities of health literature; some have provided policy-holders with visiting nurse service; many officers have been closely associated with health organizations; a large number of companies have made generous financial contributions to voluntary health agencies concerned with the control of tuberculosis, cancer, infantile paralysis, and other diseases.

On a world wide scale, concerted efforts are being made for control

of infectious diseases. The World Health Organization of the United Nations is moving toward promotion areas, a task in which Canada has played an important part.

Because an ounce of preventive medicine is better than a pound of curative medicine, much research in recent years has been devoted to discovering the causes of disease. The cost is great, the difficulties tremendous, but achievements have been well worth while.

Not much is demanded of us in conserving life and health: merely that we apply to our lives the ideal we mentioned in connection with conserving natural resources: use without using up. We have about six times more of everything—

heart, lungs, kidneys—than we need; all we are charged with is keeping them in trim.

Right here is the heart of our trouble. Time and again someone will say to you that has just finished reading such and such a book, or monthly letter, and it "makes sense." Yet you will observe no change in his life. We are all apt to see how advice applies to others, and ignore its application to ourselves.

There is no magic about conservation of life and health. Disease is not caused exclusively by germs, germs and viruses. Some of it can be averted if only we give over our neglected carelessness and take some positive actions. One of these is to have a family doctor and see him for regular check-ups, thus spotting troubles before they blaze into emergencies.

Obey the rules, remembering that some of them are different for various people. Tonics that are good for everyone are hope, joy, and contentment; all of us need good diet and lively interests; but special conditions may prompt the physician to say to one man: "avoid hard physical exertion," and to another "abstain from alcohol," and to a third "increase your sleep period and take a short rest at mid-day."

The great majority of us can enjoy good health if we will co-operate with nature. No ivory-towerism or hand-washing indifference to the consequences of our actions

HERE AND THERE

Russell McQueen a former resident of Gleichen but now living in Calgary spent several days last week in town visiting his old time friends.

The Gleichen Ladies Curling Club would like to thank everyone who donated to the Burns' Night supper and other curling functions in the past curling season.

"Listen to the Voice of Prophecy Program" each Sunday at 8.30 a.m., over station GFCN, Calgary.

The members of the local Red Cross collected \$816.35 during the recent drive for funds. The Gleichen quota was \$650.00. Gleichen and district contributed 166.35 above the quota set. Mr. Colpoys president of the local organization wishes to thank the members of the F.W.U.A. and the canvassers in town for their work.

There was a very large attendance at the Home and School Association demonstration of interior decorating, held in the school auditorium Monday evening. Mr.

Earl Ewing, a representative of our neglect will give us continuing good health. We must close our ears to the sirene voices which say everything is going to be all right, and do something, instead, to bring about and maintain that greatly-to-be-desired state.

Canadian Industries Ltd. gave a display of wall papers and wall finishes. He also showed how color could be used in every room of the house.

Operations of the Unsatisfied Judgement Fund showed a surplus of \$3,357 for the 1953-54 fiscal year, according to E. R. Hughes, deputy provincial secretary. The fund, which is used to pay court judgements in vehicle accident cases where the responsible person in vehicle accident cases is not insured, had a balance of \$316,20 at March 31, 1954. Total receipts for the fiscal year were \$351,371, of which \$313,317 was provided by the \$1 fee collected from each Alberta motor vehicle registration. Bank and debenture interest and \$27,197 recovered from judgements previously paid out of the fund made up the remainder of the receipts. A total of \$215,310 was paid out of the fund for judgements for bodily injury and property damage, and \$98,615 for medical and hospital expenses. Fees paid solicitors retained by the Crown amounted to \$13,888 while salaries of clerical staff employed to administer the fund totalled \$20,170.

It is observed at many meetings held people are inclined to be late to the discouragement of those who call the meeting. One of the many resolutions people should make and live up to is to be punctual. There are persons who habitually disregard this very im-

portant courtesy. Meetings are delayed, not infrequently the time of governing bodies is wasted while waiting for one of the delinquents. In some communities it has long been accepted that meetings will not be open at the hour named. There is nothing much more trying to the patience than the conduct of men and women too, who cause and show no concern for having wasted other peoples time or for having disturbed a service or public gathering by their disregard and indifference. This is a habit that should be "sworn off."

Vancouver has the most hotels of any Canadian city.
